

Introducing the World's First Expandable Plug-&-Play Vehicle Telematics Platform

Fast
Savings

Try It Today

Choosing how your company will grow in the future requires choosing a platform that is scalable. Geotab's GO6 device offers breakthrough innovation in fleet tracking technology - including GPS, engine diagnostics, accelerometer, and driver feedback. Now with IOX, you can expand your Geotab platform: add a Garmin for dispatching, Iridium Satellite for remote tracking, and a variety of sensors and controls.

Available through [GPS Outfitters, Inc.](#)

Breakthrough Compatibility

- + Hybrids & Electric Vehicles
- + Light Commercial Vehicles:
Delivery Vans, Pickup Trucks
- + Heavy Commercial Vehicles
- + Buses and Coaches
- + Compressed Natural Gas (CNG)

Choosing How Your Company Will Grow In The Future Requires Choosing a Platform That Can Grow With You

Geotab now introduces the **IOX** – a plug-and-play add on component that allows you to expand your Geotab GO6 device. Add a Garmin for dispatching, Iridium Satellite for tracking in areas with little to no cellular coverage, record auxiliary activity for enhanced productivity, and an ever increasing variety of other sensors and controls. Any number of these IOX's can be connected together and used at the same time offering unparalleled capability.

Transforming Fleet Management

Productivity Tracking

- + Real-Time Vehicle Tracking
